SUMMARY

Computer Science undergraduate focused on software engineering | C++ | JavaScript | React | Next.js | Node.js | MongoDB. Builds web applications and RESTful APIs with experience in authentication, database integration, and payment workflows. 300+ LeetCode problems solved in C++. Uses AI tools for codebase analysis, debugging, and implementation optimization.

EDUCATION

B.Tech in Computer Science (Core)

JECRC University, Jaipur

CGPA: 8.5

2024 – 2028

SKILLS

Programming Languages: C, C++, Java, JavaScript

Frontend: HTML, CSS, Tailwind CSS, React, Next.js

Backend: Node.js, Express.js, NextAuth.js, REST APIs

Databases: MongoDB, Mongoose, MySQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Authentication & Authorization

Developer Tools: Git, GitHub, Postman, VS Code

PROJECTS

Get Me A Chai - Creator Support Platform | React, Next.js, MongoDB, NextAuth.js, Razorpay [View Code](#)

- Built a full-stack creator support platform using **Next.js**, MongoDB, and NextAuth.js with secure OAuth authentication, dynamic creator profiles, and profile management.
- Implemented creator-specific **Razorpay** payment processing with secure order creation, payment signature verification, transaction tracking, and MongoDB-backed persistence.
- Developed Server Actions and REST APIs to manage user profiles, power public creator discovery, and display a **top 10 contributors** leaderboard while maintaining data consistency across user and payment records.

Student Productivity Web App | Node.js, Express.js, MongoDB [View Code](#)

- Built a student productivity web application with **3 core modules**: notes, assignments, and attendance management.
- Developed and integrated **4+ REST APIs** to perform CRUD operations for notes and assignments using MongoDB.
- Automated attendance tracking to simplify record management and improve data organization.

React Photo Gallery App | React, Tailwind CSS [View Code](#)

- Built a responsive photo gallery by integrating an external API with **3+ core features**: search, favourites, and dynamic image loading.
- Optimized application performance using **useReducer**, **useMemo**, **useCallback**, reusable custom hooks, and localStorage for state management and favourites persistence.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **300+** Data Structures & Algorithms problems on LeetCode.
- Ranked among the **Top 10 teams** in Idea Spark 2.0 out of **150+ teams**.
- Completed the **Google Cloud Career Launchpad – Computing Foundations** program.
